

UPGRADE YOUR CABIN TO PREMIUM CLASS.

Modular range of remote monitors dedicated to offhighway applications. Suitable for a connected electrical architecture with safety & cybersecurity features management.

- Simplicity
- Ergonomic control
- Comfort
- Sunreadable
- High viewing angle
- Adjustable backlight
- Multi touch for fluid gesture control
- Severe environments

FOR 12V & 24V
APPLICATIONS

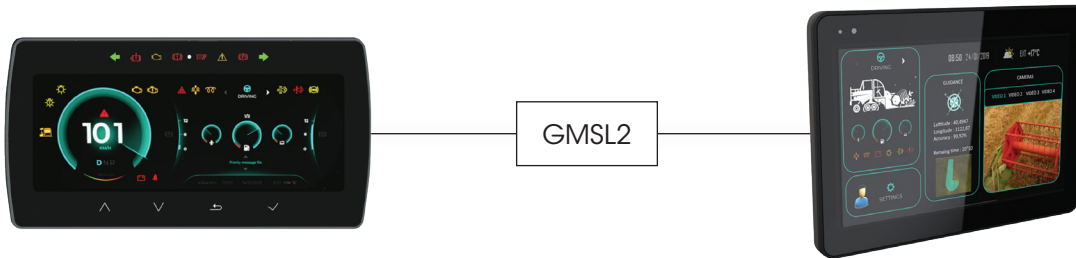

FROM START OF THE PROJECT:

- Comprehensive documentation.
- Training sessions.
- Experts (in architecture, safety, cybersecurity).

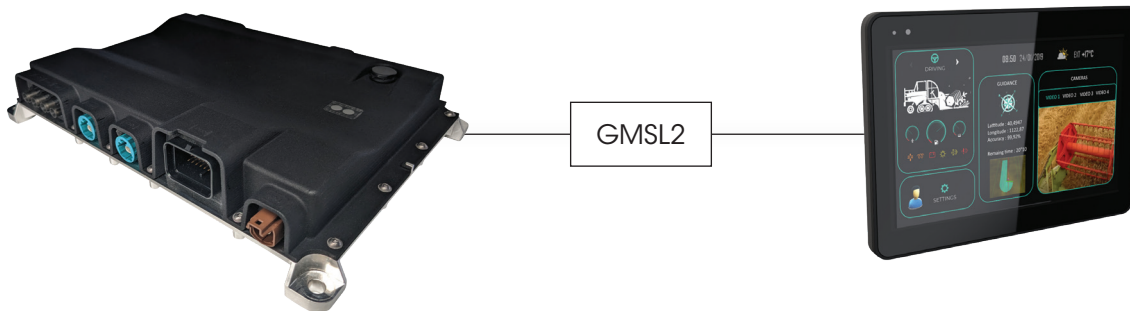

THROUGHOUT VEHICLE LIFECYCLE:

- Manufactured by ACTIA.
- Support from Field Application Engineers.
- Maintenance in Operational Conditions (obsolescence management).

FULL INTERACTION WITH A MASTER CLUSTER

FULL INTERACTION WITH A MASTER ECU (API REST)

FEATURES FEATURES

For 12 V & 24V applications

TFT transmissive colour display

Colours: 16.7M (8bit/colour)

Display resolution : up to 1920*1080, 200 dpi

Contrast ratio : up to 1000 typ

Viewing angle (upper + lower, right+ left) up to 85°

Optical bonding

Finishing: AG/AF/AS

Glass IK04 compliant

Ambient light sensor

Multi touch: >5

Internal buzzer

Reverse polarity

Load dump

High speed data link: GMSL2

Configurable by software

ENVIRONMENT

Operating temperature: -30/+70

Storage temperature: -40/+85

IP grade: IP6K5

QUALITY & RELIABILITY

Designed & manufactured in France according to automotive standards.

Compliant with all the standards related to a RSE level.

25 years experience in HMIs, dedicated or COTS products
